[FarshidNaji@gmail.com](mailto:FarshidNaji@gmail.com)

## **About Me**

*With over five years of experience in Revit, 3ds Max and Unreal Engine, I am a 3D Artist. I have a strong background in 3D modeling, lighting, and optimization. I use UE5 and 3DS Max, and other tools to create high-quality artwork that meets each project's technical and artistic requirements. I am very passionate about Creating 3d Environments as well. I am a team player also strong in problem-solving and 3D Arts.*

*Kind Regards  
Farshid Naji*

## Experience

---

### **3D Artist (Unreal Artist)**

*Emperia – London (Remote)*

*June 2022 to Nov 2023*

### **BIM Modeler & Real-Time Visualizer**

*Restless Design - Dublin (Remote)*

*July 2022 to December 2022*

### **BIM Modeler & Real-Time Visualizer**

*Prism Architecture - Fort Lauderdale, FL (Remote)*

*May 2021 to June 2021*

### **Architect/Interior Designer**

*Epic Architects - Istanbul*

*April 2018 to February 2021*

### **3D Visualist/Graphic Designer**

*Tandis Architects - Istanbul*

*February 2016 to July 2018*

---

## Language

- *English - Intermediate*

## Skills

- *Interior Design (3 years)*
  - *Revit (5 years)*
  - *Architectural Rendering (5 years)*
  - *3D Rendering (5 years)*
  - *3ds Max (3 years)*
  - *3D Design (5 years)*
  - *Building Information Modeling (4 years)*
  - *3D Animation (4 years)*
  - *Unreal Engine (5 years)*
-

# 1. Concept Design & 3D Modeling

## Descriptions :

*Architectural concepts are the designer's way of responding to the design situation presented to them. They are a means of translating the non-physical design problem into the physical building product. Every project will have critical issues, central themes or problem essences, and the general issues of designing a building can be approached in a number of ways.*

## 2. Game Environment Design

### Descriptions :

*3D environment design is a crucial element in modern video game development. It's a process of creating immersive virtual environments that the player can explore and interact with. This can include anything from natural landscapes and urban cityscapes to sci-fi spaceships and fantastical realms. Essentially, it's the art of building virtual worlds that look and feel real enough to transport players to another world entirely.*

### Software:

*Autodesk Revit*

*Autodesk 3DS Max*

*Unreal Engine 5*

## 3. 3D Animations

### **Descriptions:**

*The 3D animation definition that describes its most common usages is: the process of creating three-dimensional moving images and placing them into a digital environment. These objects are generated in software designed specifically for 3D animation. Such programs allow 3D Animators to create the illusion of movement needed to bring objects to life.*

### **Software:**

*V-Ray GPU*

*Unreal Engine 5*

*DaVinci Resolve*

## 4. Architectural Interior & Exterior Modeling and Visualization

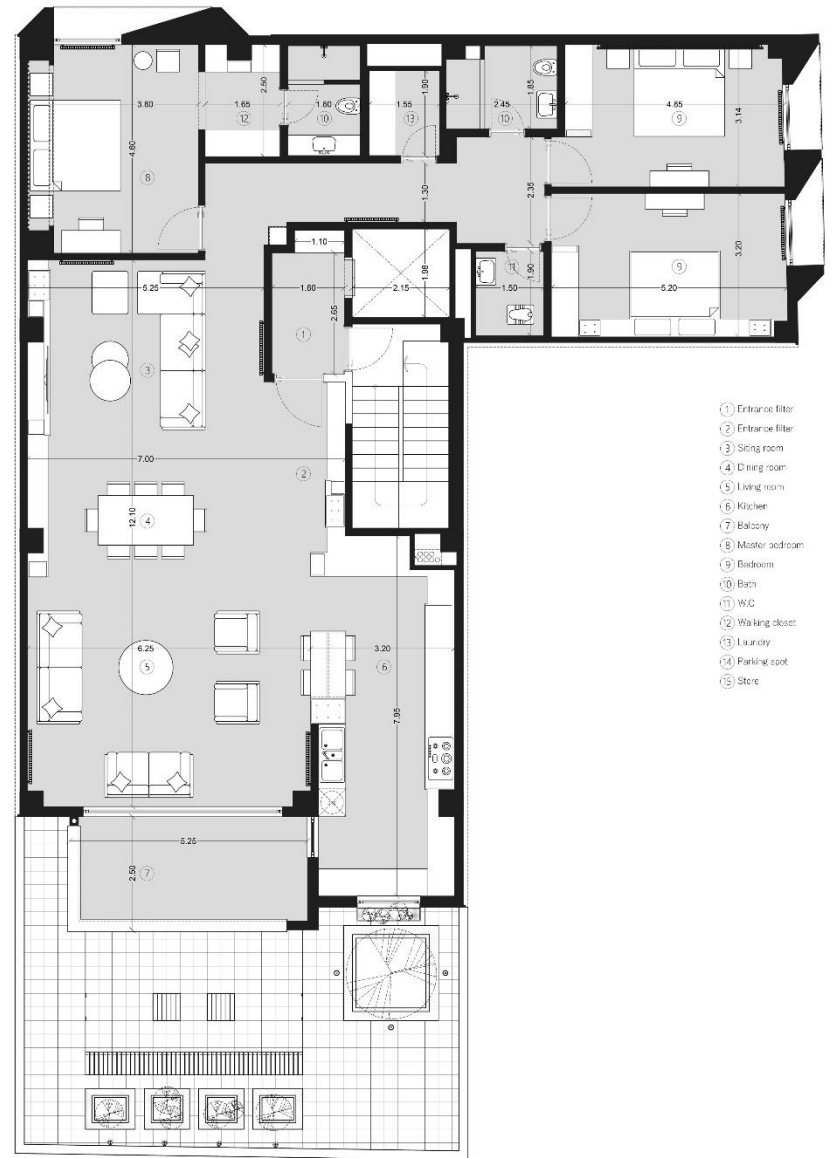

### Descriptions :

*Architectural design is an important phase of every project because it focuses heavily on the functionality and aestheticism of your project. Every design detail will make a difference in the day-to-day life of those who will be utilizing the space. When it comes to functionality, we know you want the most efficient and seamless space possible. When it comes to aestheticism, we know you want the space to meet your vision and create the most fitting environment to meet its purpose.*

**Software:** *Revit, 3DS Max, Photoshop*

**Software:** Revit, 3DS Max, Photoshop
